BYRON RANDALL WILSON III
4151 TEE CIRCLE
SARASOTA, FL 34235

CONFIRMATION NO. 8937
UPDATED FILING RECEIPT

OC000000016337470

Date Mailed: 06/21/2005

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).**

Applicant(s)

Byron Randall Wilson III, Sarasota, FL;

Power of Attorney: None

Domestic Priority data as claimed by applicant

Foreign Applications

If Required, Foreign Filing License Granted: 06/02/2005

The country code and number of your priority application, to be used for filing abroad under the Paris Convention, is **US10/767,305**

Projected Publication Date: 03/16/2006

Non-Publication Request: No

Early Publication Request: No

Title

Iron Byron's teezitup

: Steve Blau

Wilson III

Golf tee and ball placement device "TEEZITUP"

Inventor: Byron R. Wilson III 4151 Tee Circle, Sarasota, FL 34235

Application Number: US10/767,305

Filed: September 14, 2004

Attn: Steve Blau

I have modified the claims and included references to the four patents not found in my Patent attorney's initial search. I am amazed to experience a form of mental telepathy or coincidence on how ideas can occur at the same or nearly the same time. My first tee and ball placement device was made in Jan. 1961. Since I am cripple the old phrase "Necessity is the Mother of Invention", came into play and I built one just like the application but on a long pole with a metal probe on the end so you can stick it into the ground while hitting the shot. It was cumbersome and dangerous, but got the job done. I was afraid someone would get stabbed or injured by it so I didn't want to market it. As time rolled on I developed the current one. I can visualize a wire formed device that recesses into the shaft at the hollow end of the grip of the golf club and can be pulled out to be deployed at any time. How do I patent that since I am now unable to build one?

Sincerely
Byron R. Wilson III
